Hello,

I hope this message finds you with a sigh of relief and a feeling of contentment regarding your operations performance as we begin to slow down for the winter months. As I reflect on 2019, I can’t help but think about some of the challenges that each and every one of us faced this year. Damaging storms and torrential rains either directly or indirectly impacted each one of our operations. As we approach 2020 the challenges may be different but essentially, challenges still remain. As a young manager with Terminix, my regional Manager imparted some words of wisdom that I have always carried with me “be thankful for the problems and challenges that you encounter, if it were not for those, someone with less qualifications could perform your job”. Bittersweet but true.

Please remember to mark December 3rd thru the 5th off your calendar and join us in St. Louis as we team up with the Greater St. Louis Pest Control Association for our Annual Conference and Exposition. Education committees for both organizations have been hard at work creating a great roster of speakers. I hope to see you there.

This quarter I would like to introduce you to Gary Schuessler. Gary is the President of Advanced Pest Control Systems in Cape Girardeau, MO. Advanced employs 21 employees and services both Missouri and Illinois. This will be Gary’s 10th year on the MPMA board and his 40th year in our industry. He currently serves the board in the capacity of chairman for the Political Action Committee and is the President Elect for 2020. This will be my last address to you as President for the MPMA. It has been an honor to hold this position for the last two years. Equally an honor to serve with the men and women who donate their time and talent to make the MPMA a success.

I leave you in very capable hands!

Respectfully

Randy

Randy Coleman, ACE, MPMA President

YOU HAVE TO HAVE AN EMPLOYMENT MANUAL, AND A LAWYER.  HERE'S WHY

There was a time in my career if someone in the company did something wrong, I assumed others were doing the same thing. Each company meeting had a section informing the group about whatever had happened that week and the proper way to handle that situation in the future. I’m speaking of things like backing into a birdbath, leaving the gate open (always a problem!!), or not getting the service ticket signed. Nothing too personal, just day to day complaints. I have not completely decided this is a bad way to address things but the reality was that nobody wanted to come to company meetings. It was viewed as a punishment and people felt ‘beat down’ instead of better informed! If I had a company today I would still have a “close the gate” meeting at least once a quarter, but only because I have personally chased a lot of mutts! However, that is not the topic today.

Perhaps a better way of dealing with bad behavior and/or mistakes is to take the individual into your office and show them in the employment manual where the subject is highlighted. Ideally, it will point out the company stance on the way that particular issue is addressed. Take the birdbath example. Your manual would say something like: whenever possible, back into any parking space making sure to survey the area you are backing into. Look out for children, pets or objects that could be hurt or damaged - and be especially careful in this situation.

Then, when Bob is sitting in your office because he was not careful backing, you point out the appropriate section in the manual and discuss it with him. Once he thoroughly understands his error, you have him sign a prepared statement affirming that he will abide by the policy and what the consequence might be if he doesn’t. Then move on with your day. This can only work if you HAVE a policy manual.

Giving an employee a manual and expecting them to read it is a mistake. That will never happen. I think a better way is to break it into sections and review it all year as a group. Assign a different person each meeting to spend 5-10 minutes on a specific section. This person should interview you or the HR director about the meaning of the section and then present it to the group. That way it doesn’t feel like you are scolding the entire company. Let this person know you expect a well thought out presentation and give them a 25 dollar gift card for their effort once the task is completed. You are going to have to continually review the manual because new and different situations will be added all the time. Plus you will have new employees. Make sure your manual is on a word document that can be easily edited and distribute the new pages as these edits take place. Yes, it’s a pain. But it might save your company when an employee decides to sue you.

It should go without saying that anything in your manual should meet current legal employment standards. These standards change and you need to be informed and change your policies accordingly. I remember a man with a beard applied for a technician position while wearing a black leather skirt and pink sweater. Twenty years ago we didn’t think twice about telling him he would not be a good fit for our conservative-housewife clientele. I haven’t checked recently but I would be concerned about saying that now. You may not like it, but the law changes and you’d better be sure you know what the current status is and that your written policies address these situations. If you don’t have a lawyer to check with you should develop that relationship very soon! Any time something seems controversial, an employment lawyer should advise you. If you don’t have one, start looking now...before you need one!

To comment on this or any other topic, you can reach Pat at discoveryretreat@aol.com.

Is your rodent monitoring service 24x7?

It can be.

Provide more proactive and effective pest management with round-the-clock monitoring, real-time capture alerts and up-to-the-minute program verification. The result? Freedom that can give you the time you need to provide more focused IPM inspections and a higher value service. To learn more, call 800-331-2867 or visit BeyondSmarterBusiness.com.

Control that sets you free
Syngenta Simplifies Cockroach Control With the New Secure Choice Cockroach Assurance Program
Proven Combination of Products and Protocols Provides Guaranteed Control of Prevailing Cockroach Species

To better equip pest management professionals (PMPs) to efficiently control cockroaches, Syngenta has launched its new SecureChoice℠ Cockroach Assurance Program. This program gives PMPs a proven, integrated pest management (IPM) approach to tackling German and other prevailing cockroach species for guaranteed results.

The SecureChoice Cockroach Assurance Program guides PMPs through three phases of a cockroach treatment: an initial visit, follow-up visits, and continued maintenance and prevention. As part of the program, Syngenta also includes best practices for steps like inspection and monitoring, which are critical components of an IPM approach. By following the recommended SecureChoice Cockroach IPM Guide, Syngenta guarantees a reduction of at least 90% of the cockroach infestation during the first four visits over a 60-day period. If adequate reduction is not achieved, Syngenta will provide the needed Syngenta products for retreatment.

“Cockroaches are a notoriously difficult pest to eliminate,” says Marshall Gaster, market manager for Professional Pest Management (PPM) at Syngenta. “Our program pairs flexible and sustainable IPM strategies with effective products to give PMPs the level of control they need for their customers. Plus, PMPs have the peace of mind that their investment is assured by Syngenta.”

The SecureChoice Cockroach Assurance Program features multiple active ingredients and formulations to help manage insecticide resistance and bait aversion. It recommends using Advion® WDG insecticide with Optigard® Cockroach Gel Bait, and then rotating this combination with Optigard Flex liquid insecticide and Advion Evolution Cockroach Gel Bait every 90 days. The non-repellent liquid insecticides can be used with the gel baits for more thorough control, and all of the recommended products also qualify for yearlong savings through the PestPartners℠ 365 Program.

“Syngenta did the hard work of testing this protocol so PMPs don’t have to,” says Nicky Gallagher, technical manager for PPM at Syngenta. “By taking the guesswork out of cockroach control, we’re enabling PMPs to spend less time on trial and error and more time taking care of their customers.”

To learn more about the new program, including terms and conditions, visit SyngentaPMP.com/Cockroach. Join the Twitter® discussion using #SecureChoiceProgram.
Syngenta has introduced Advion® WDG insecticide – a sprayable formulation of the Advion brand. This product will give pest management professionals (PMPs) a more versatile, non-pyrethroid, non-neonicotinoid solution for commercial and residential areas.

Advion WDG controls a broad range of targeted insects, including large-colony ants, cockroaches and termites. It also features a MetaActive™ effect that activates the insecticidal properties of the active ingredient, indoxacarb, once it reacts with enzymes only found in target insects, meaning non-target organisms are less likely to be affected by the product.

“Our MetaActive effect is an advantage for PMPs,” says Marshall Gaster, market manager for Professional Pest Management (PPM) at Syngenta. “It offers peace of mind by providing the targeted control their customers expect.”

Advion WDG is a versatile product that can go anywhere Advion gel baits can go — and more. In addition to flexible indoor uses, it can be applied as a perimeter band outdoors up to 10 ft., making it ideal for applications around single- and multi-family residential buildings and commercial facilities. Advion WDG can also be used with Syngenta gel baits to enhance efficacy against target pests.

Additionally, the Advion WDG label allows for use in food-handling areas. This means PMPs can bring the sprayable protection of the Advion brand into a variety of commercial spaces, like commercial kitchens, and as spot and crack-and-crevice treatments in food-processing facilities while the facility is running.

“PMPs have used the Advion bait products for many years, and we’re proud to provide the same reliability in a sprayable formulation,” says Pat Willenbrock, head of marketing for PPM at Syngenta. “Adding Advion WDG to a pest management rotation should be an easy decision for PMPs who are familiar with the Advion brand.”

To learn more, visit SyngentaPMP.com/AdvionWDG. Join the Twitter® discussion using #AdvionWDG.

Selling to Women for Men AND Women 5 Key Strategies
Nancy Friedman, The Telephone Doctor

Yes, selling to women is different. These tips came from surveys in my programs from the women themselves. If you pay attention to the needs – you’ll see a difference and it could mean more business.

Women control a lot of the business decisions. Often behind the scenes as well as up front.

Ask a few women if they’ve been ignored when going with their husband/partner/etc. and you’ll see the reaction. It’s fairly common. We’re fairly easy to please. Check out a few of the things we value.

1. **Eye contact.** Not staring, a few glances to the eye, vs. watching what’s going on around you, will work.
2. **A firm handshake.** This is a biggie. We DO NOT like the loose fish type handshake where you hold on to 3 fingers. On the other hand, no need to break our bones either. We like a firm handshake.
3. **Sympathy.** An understanding you LISTEN.
4. **A compliment.** Don’t hit on us; however, there is not a woman alive that won’t react positively to a kind, gentle comment. Something like: “Good color on you,” “That’s a great looking watch you’ve got.” A generic, kind comment. It’s soooo easy.
5. **A smile.** This is really number 1. We left this to the last, so you’ll remember it. As a woman, we are taught at a very young age to smile. We used it on our DADDY most of the time. We enjoy being smiled at. Not being hit on, not an idiot grin, just a nice enjoyable smile. It’s so important in sales. Really, anywhere.

Ladies, let’s hear from you... what else shall we add to this list?

**ServiceMark Licensed by NPMA to Print Form NPMA-33**

ServiceMark Communications has been licensed by the National Pest Management Association to print the newly updated and copyrighted National Wood Destroying Insect Report form NPMA-33. The new version, revised July 1, 2019, may be used for WDI inspections immediately but MUST be used for all inspections on or after January 1, 2020. The previous version of form NPMA-33 will become obsolete after December 31, 2019.

ServiceMark offers economical and convenient solutions for multi-part carbonless and laser compatible business forms, including form NPMA-33 and many other pest control business related documents. Packages of ServiceMark’s 50 ct. NPMA-33 forms are available as individual forms or bound in receiptstyle books from pest management suppliers nationwide. Personalized forms imprinted with an inspection company’s information can be ordered directly from ServiceMark Communications at www.servicemarkonline.com in quantities as low as 100 reports.

Next year ServiceMark Communications will celebrate 25 years of providing printing and marketing products and graphics services to the pest management and home inspection industries. Owner Clinton Kemp began his career as Communications & Training Director for B&G Chemicals & Equipment (now Target Specialty Products) in 1992. Recognizing and need for economical business form printing solutions and advertising and marketing services for the pest control industry, he officially founded ServiceMark in 1995. “It’s been a rewarding experience assisting companies over the past nearly 25 years with their business printing and marketing needs and watching so many of them grow into leaders in their market,” Kemp said.
Annual Conference & Exposition

Agenda

Tuesday, December 3, 2019

7:00 am  Registration, Continental Breakfast and Exhibitor Set-Up
8:00 am  MPMA General Membership Meeting

Do you know someone in the Pest Management Industry who has worked hard for the industry? Maybe they have done something beyond the call of duty. Maybe they have done something to help not only the Pest Management Industry, but their fellow man. Think about it! I am sure each of us knows someone who deserves to be recognized for their contribution to our industry.

These awards will be presented at our Annual Conference which is being held in St. Louis in December. Three types of awards are planned. Listed below are the types of awards and their respective criteria. Please fill out the form and include a short letter stating why you feel your nominee should receive an award.

Mail the nomination form below and your letter to:

Ron Lang, Chairman
Havener’s Termite & Insect Control, Inc.

(Memberhip dues increase effective July 1, 2019)

Active Members: Any person, firm or corporation engaged in pest management service work, for hire to the public at large shall be eligible for membership in this Association.

Affiliated Members: Any active member that operates or controls another firm, and/or business location actively engaged in the pest management service business.

Limited Members: Any person, firm or corporation not fully conforming with qualifications for Active members. A limited member shall automatically become an Active member upon meeting the qualifications set forth for Active Membership.

Allied Members: Any person, firm or corporation not engaged in pest management service work but which manufactures or supplies products, equipment, materials or provides services used by the pest management industry shall be eligible for Allied membership.

Honorary Members: Any person who has made a contribution of material benefit to the pest management industry may become an honorary member by three-fourth (3/4) vote of the members of the Association in annual meeting assembled.
